WORK EXPERIENCE

Partner and Co-Founder

Jan. 2022 – To Date

Data4MOZ/Data4Angola, Mozambique and Angola

Presently assuming the role of COO and Co-founder at Data4MOZ/Data4Angola, Mr. Inguane is actively engaged in spearheading a data-centric analytical platform designed to inform decision-making in the realm of natural resource management in the Southern Africa Region. Data4MOZ's overarching objective is to invigorate the already existing as well as untapped ecosystem of information management by harnessing the potential of data within the natural resources and land administration sectors. His current responsibilities include the strategic curation and oversight of partnerships across four distinct market segments within Mozambique's and SADC development sector. These segments encompass Land Administration, Agriculture and Rural Development, Forestry and Conservation, Urban Planning, Transportation and Mobility, and Climate Change and Environment.

Recovery Specialist to coordinate sectoral adaptation of PDNA methodology Aug 2025 – Dec 2025

UNDP, Mozambique

Lead National Consultant supporting the development of the Post-Disaster Needs Assessment (PDNA) Methodology Guidelines, with a focus on key sectors such as Agriculture, Transport, Housing, and Education.

Lead Consultant Loss and Damage Stocktaking Exercise

July. 2025 – Aug 2025

UNDP, Mozambique

Lead National Consultant for the Loss and Damage Stocktaking Exercise that aims at evaluating losses and damages due to impacts caused by extreme and slow-developing weather events in Mozambique and assess the existing policies, institutional frameworks, and financial mechanisms,

identify gaps and opportunities for improvement. The exercise will inform the Loss and Damage in the Mozambique's NDC 3.0.

Lead Consultant GEF PPG Mozambique TRANSFORM Project Dec. 2024 – Aug 2025

UNDP, Mozambique

Lead National Consultant for the USD 15 million GEF-8 Project Preparation Grant (PPG) under the TRANSFORM Project, implemented across two conservation landscapes in Mozambique. Responsible for coordinating the PPG implementation process on behalf of the EBD Global and Data4Moz consortium.

PPG Design Co-Leader GBFF Protected Areas System in Angola

Aug. 2024 – Aug 2025

UNDP, Angola

PPG co-leader and socioeconomic and resources governance specialist for the designing and implementation of the \$3 million-dollar GBFF project to be financed through GEF.

Terminal Evaluation SUNRED PROJECT II

Feb.2024 – Sept 2024

UNDP, Mozambique

Lead consultant in the terminal evaluation of [SUNRED PROJECT II](#). Among other tasks, I am responsible for the designing and implementation of the entire evaluation process, including the stakeholders engagement, data collection and reporting.

Terminal Evaluation BIOSFAC PROJECT

Mar.2023 – Sep. 2023

UNDP, Mozambique

Lead consultant in the terminal evaluation of [BIOSFAC PROJECT](#). Among other tasks, I am responsible for the designing and implementation of the entire evaluation process, including the stakeholders engagement, data collection and reporting.

Global Digital Solution and Impact Measurement Consultant

Dec. 2021 – To date

Earthworm Foundation, UK Offices

Consulting for Cadasta Foundation in the design and implementation of the global solution and impact measurements for resilient and regenerative supply chain across Asia, South Americas and Africa. My tasks involve management and coordination of data framework customization, including the creation of survey instruments to be implemented across countries and targeting different stakeholders in the commodity supply chain. Support country teams to manage data and generate analytics and insights that could help both private sector and smallholder farmers implementing regenerative supply chain models.

Food Systems Assessment Consultant

May. 2021 – October. 2021

FAO, Global

Team member of the Global Food Systems Assessment commissioned by FAO/EU/CIRAD, aiming to identify challenges and opportunities to improve the current situation in the global agri-food systems. Supporting the team of consultants assigned to Mozambique. Responsible to provide an evidence-based assessment on the biophysics, environmental and territorial balance challenges, and its impacts on the current food systems. Additionally, providing lever analysis to illustrate areas in which attention and policy changes are urgently required.

Feasibility Study and VC Mapping in the Buffer Zone of GNP

Jun.2022 – Oct. 2022

Gorongosa Restoration Project, Gorongosa

Lead consultant in the design and implementation of a value chain mapping and feasibility study for community led business in Djutchenje Community. Among other tasks, I was responsible for the conceptualization of the questionnaire design, field data collection and team management. I have also managed the process of designing the methodology for qualitative data collection, including stakeholders' consultation. Additionally, my tasks included the analysis of data as well as final reporting to the PMU.

Direct Job Creation Assessment for Cash Crops in Manica
IFC Corporation, HQ

Feb. 2022 – Jun. 2022

Consulting for IFC Corporation in the data collection and assessment of direct job creation for private investments on cash crops in Manica province. My tasks involve management and coordination of data collection and stakeholders' consultation. Support the data collection firm in the implementation of field surveys as well as coordinating the review and analysis of data.

Programs Specialist
Cadasta Foundation, Washington DC, US

Mar. 2019 – August 2021

Served as partners' engagement and development primary technical point of contact through training development and collaborative support in the implementation of land and property rights documentation using fit-for-purpose Geographical information systems (GIS) solutions for marginalized groups in rural and urban areas. The current tasks include the development and management of regional partnership engagement strategy in Southern Africa and Brazil. Additionally, provide higher level assistance on the discussions of national LADM solutions; Engage with national and international stakeholders in the design and implementation of land-use and management solutions to minimize climate and development challenges in the urban and rural areas across Africa and Latin America.

Featured projects:

1. **Geo-economic and Landscape Survey for the Expansion of Palm Oil Supply Chain in Tome-Açu microregion, Brazil:** establish a framework to assess the historical land use changes, identifying and mapping corridors of palm oil production and assess the status of property rights in Tome-Açu microregion, including socioeconomic data of small farmers involved in the palm oil supply chain.
2. **Supporting Land Documentation and Property Registration in Bonito Municipal, Pernambuco, Brazil:**
focal point in the designing of the cadastral surveying framework to streamline data collection for the regularization of individual properties across Bonito Municipality under the Federal Housing Program "Minha Casa Legal".
3. **Enabling location-based data in the Agriculture Value Chain in Tome-Açu, Para, Brazil:** coordinating the design of a workflow process that integrates the Brazil Rural Environmental Cadaster framework with the Tenure Security information in the smallholder farmers activities.
4. **Streamlining Community Land Value Chain in the National Land Information Systems, Mozambique:** supported the integration of the civil society and private stakeholder's land titling initiative, within the Mozambican Land Information System (SIGIT).
5. **Systematic Land Inventory in Madagascar:** worked with Transparency International to develop a field data collection approach to systematically map, document and assess the ownership of land in Italy district, largely owned by the former French Settlers.
6. **Mozambican Community Based Governance System, Mozambique:** supported the creation of an integrated system (land tenure, resource economy, governance, and Disaster reduction) aiming to provide real time information of resource management at the community

level.

7. **Asset Mapping in the city of Tallinding, The Gambia:** collect and display infrastructure assets in the city of Tallinding using remote sensing technology. The work includes utility mapping, cadastral mapping, geospatial analysis using our drone mapping to create a topographic map and investigate flooding, tree cover and floor area ratio.

Impact Evaluation Consultant

Mar. 2017 – Nov. 2018

Social Impact, Washington DC, US

Team member of the Impact Evaluation for the MCC-funded Land Project aimed to improve land policies and regulations, assess the effectiveness of land administration services, and expand access to land use particularly for individuals and communities in selected urban and rural areas in Mozambique. Among other tasks, was responsible to organize and conduct stakeholders and community consultation, including an inventory and assessment of the existing institutional capacity at Provincial Cadastral Services and Municipal Cadaster Departments in the Northern Mozambique.

National Outreach Advisor

Mar. 2016 – Sept. 2018

iTC Foundation (iTC-F), Maputo, Mozambique

Served as National Outreach Advisor, providing direct assistance in the designing and creation of the organization engagement and partnership strategy on land and natural resources policies. Acted as the focal point for the National Land Forum, directing all the activities aiming to involve various national organizations and stakeholders network on land tenure under the Terra Segura Program.

National Stakeholder Engagement Expert

Apr. 2016 – Nov. 2016

United Nations Development Programme, Maputo, Mozambique

Team member of the \$15.7 million "Strengthening the conservation of globally threatened species in Mozambique through improving biodiversity enforcement and expanding community conservancies around protected areas project" focused on Gorongosa National Park and Niassa Reserve. Functioned as the focal point for community and stakeholder consultation, ensuring fairness and transparency of the project preparation process and the effective engagement of stakeholders. Led/co-led activities to ensure an effective, UN guidance-compliant project design process.

Environmental Analyst

Jul. 2014 – Sept. 2018

Energy Institute, Australian National University, Australia

Conduct the environmental and economic impacts of the ASEAN Power Grid Project. Functioned as a point of contact for data collection pertinent to the socio-economic and environmental impacts associated with the establishments of a transcontinental power grid.

Senior Advisor

Oct. 2010– May 2011

AMBERO Consulting GmbH, Manica, Mozambique

Provide natural resource management advisory support to the Zimbabwe-Mozambique-Zambia Transfrontier Park (ZIMOZA), under the Transfrontier Conservation Areas and Tourism Development Project (TFCATDP) funded by the World Bank Global Environment Facility (GEF). Provided strategic guidance and capacity development to the ZIMOZA team. Supported the establishment of community institutions to strengthen community land rights and voice with regards to their interests in natural resource management in the Tchuma- Tchato region. Worked in close cooperation and partnership with various government institutions in Zimbabwe, Zambia, and Mozambique. Stood up a grant mechanism and project design frameworks for community-based natural resources projects, focused on balancing social, economic, and environmental considerations in ZIMOZA. Engaged and facilitated stakeholder discussion to develop comprehensive policy framework priorities.

Socio-Economic Consultant

Apr. 2011 – Aug 2011

WWF/USAID, Mozambique

Team member of the Southern Africa regional Stocktaking exercise of USAID \$250 million support

on CBRNM. Responsible for stakeholders' engagement consultation and investment assessment at a local, national and regional level.

Climate Change and Vulnerability Assessment

Apr. 2008 – Jan. 2009

FAO, Gaza Province, Mozambique

Designed and implemented a climate vulnerability assessment for Limpopo and Mapai corridor in Gaza province as a part of a regional integrated spatial assessment. Among other tasks was responsible for developing a comprehensive data collection and analysis plan, including conducting community and stakeholder's engagement meetings across the province.

COUNTRY EXPERIENCE

Mozambique, Angola, Australia, Brazil, Indonesia, Malawi, South Africa, Zambia, Zimbabwe, United States and The Gambia.
